Fractional Net Changes Give No Idea of the Wide Movement.

#### **HEAVY SELLING TO TAKE PROFITS**

Market Was Generally Stormy in Early Dealings and Was Borne Down by a Very Sharp Reaction-Bonds Active and Higher.

(By Associated Press.)

NEW YORK, Nov. 27.—Selling to take profits again overcame the mrket to-day, and the general level or prices is lower than it was last night. The day's net changes, which are tractional except in a few stocks, give no idea of the wide movement of prices during the day, nor of the notable strength shown at times by a few stocks.

This is due to the fact that the market was generally strong in the early dealings and was only carried below last night s level by a very sharp reaction, which also reduced the gains of the strong stock. The notably strong points were in the coalers, Southern Railway preterred, Baltimore and Ohio, Southern Pacific and the American Smelting stocks. The movement in the coalers was helped by the wintery weather reported.

The movement caused the revival of old rumors of consolidation or exchange of control, the effect being notably manifest in New Jersey Central, which rose 6 points to 149, reacting 145. The business in the group was small, except in the Readings, which reflected very heavy and concentrated buying. The first preferred rose at one time 2%, and closed a point lower. Large buying continued in Southern Rallway preferred, and rumors continued of a coming increase of dividend and a dissolution of the voting trust. This was the only stock, except Denver and Rio Grande, of yesterday's strong group which held out to-day.

The American Smelting stocks rose 2% and 1% for the common and preferred on tik of the absorption of the principal competing interest. International Power rose 4 ponns without explantion.

Shorty before the close very large buying of Southern Pacific came into force, the individual transactions running from one to six thousand shares, and litting the stock? "neight During the early nari

Shortly before the close very large buying of Southern Pacinic came into force,
the individual transactions running from
one to six thousand shares, and lifting
the stock 2 points. During the early part
of the day, while the general market was
strong, the steel and copper stocks were
weak. The steel stocks showed a disposition to rally, especially Steel and Wire,
which got above .. at one time. The
stock closed unchanged. Amalgamated
Copper was very heavily sold, and late in
the day fell to 94%, and closed with a
net loss of 75.

The general reaction in the market was
not accompanied by any unfavorable development in the general conditions, but
to disappointment of some speculative
expectations. The principal of these was
that to-day's London Stock Exchange
settlement would develop a very heavy
short interest in Americans. On the contrary, it was shown that quite a large
long account existed in Americans, and
that London sold stocks here for the new
account.

Conditions in the money market con-

account.

Conditions in the money market continue very easy, in spite of the gain by the Sub-Treasury from the banks on routine operations and the approach of the monthly settlement period, which usually makes demands on the money The bond market was active and prices

were higher. Total sales, par value \$3,075,000. United States 3's declined 1/2 and the new and old 4's advanced 1/4 or the last call.

The total sales of stocks to-day were

### THE ARMY BILL-

Republicans Want to Leave Size of Army to President.

(By Associated Press.) WASHINGTON, Nov. 27.—The House Committee on Military Affairs met to-day for the purpose of considering the new army bill. The business was mostly of a preliminary character, the discussion be-

tee apparently are in favor of giving the President such an army as he may re-quire. The draft of a bill already prepared by Chairman Hull will be the basis of the measure which the committee will consider. This bill provides for an army of the maximum strength of 100,000 men, with a minimum of 50,000, and general officers at the rate of one brigadier-general for each 4,000 men, with major-generals in preparation

proportion. Chairman Hull states that there will be but one bill prepared, and if any staff changes are contemplated they will be incorporated in that measure.

Incorporated in that measure.

The members of the committee will confer with Secretary Root in a day or two. This afternoon they went over the bill, which has been known as the War Department bill, drawn on lines suggested

and approved by Secretary Root.

The Secretary expects to give further consideration to the bill, and then he will send it to members of the committee.

The War Department bill provides for a maximum of \$6,000 men and a minimum of 58,000, with thirty regiments of infan-try, fifteen regiments of cavalry and a gradual increase of the artillery until at the end of five years there will be 18,000 men. The artillery is not to be organized into regiments, but as batteries and field artillery. With the max mum army there are to be 150 men to each infantry company, making 1,830 men to a regiment. The maximum of a cavalry troop is to be 100 men. There is no provision for a lieuten-ant general in the War Department bill, but under the present law the senior major-general commanding would have the rank of lieutenant general.

The War Department bill does not give the same increase of major generals and trigadier generals as the Hull bill. The detailed staff provisions are an important feature of the measure. It provides that hereafter vacancies in the staff, excepting the medical corps, pay corps and engineers, shall be filled by details from the line, such detailed officers being subject

to line duty at any time.

This is the same as the Hull bill of the last Congress, and is earnestly favored by

sentences ranging from two to ten years, and they had been employed, under Superintendent Andrews, in working the Bedford county roads. The names of the six men who escaped are: Charles Harris, George Hunt, Junius Coleman, Richard Carter, Jerry Scott, and Sam Blackwell. Judge Brown, of Bedford, has offered a reward for the capture of the fugitives, and every effort is being made to ascertain their whereabouts.

Mr. Green H. Nowlin, of this city, has been elected president of the Lynchburg Coal and Coke Company and the Eureka Coal and Coke Company, to succeed the late Captain R. H. T. Adams. The vacancies in the boards of directors caused by Captain Adams' death, have been filled by the election of his brother, Mr. I. H. Adams, Sr. These companies have extensive mining interests in McDowell county, West Virginia.

pletely blocked all traffic on the Chesapeake and Ohio eince Sunday, has been cleared away. The first train got through to-night.

The passengers on the delayed trains have been treated in the kindest manner by the company, which has, at its expense, provided them with board and lodging at the best hotels and done everything that would add to their comfort. The clearing of the track has been accomplished in a much shorter time than was finst anticipated, and much credit is due to the management of the road in the way it has met this emergency.

The Chesapeake and Ohio officials are exerting every effort to find the instigator of the "Hinton wreck report." Special agents have been detailed and no effort or expense will be spared to determine the man.

The whole story seems to have grown out of the derailment of several freight cars at the western end of the Alleghany tunnel, in which no one was hurt and practically no damage done.

The local passenger department of the Chesapeake and Ohio yesterday issued the following statement:

"The rumor in circulation to-day that there had been an accident to a passenger train on the Chesapeake and Ohio Pailway is totally without foundation of the Pailway is totally without found were, however, safely landed in their posi-tion, and the movement was successfully completed. Dr. Benson informed Colonel Langhorne afterwards that when the Grays went safely into line, Colonel W. C. Preston, the great Southern orator, who was a member of the staff, remarked to General Beaureguard, "That's a spiendid company." General Beaureguard stretch-ed himself in his stirrups and replied: "I have never seen a better drilled company in the United States Army or out of it," which was a great compliment for a new which was a great compliment for a new
